## SUMMARY

Backend Developer with 3+ years building fintech APIs and services in C# and ASP.NET Core. Strong in REST APIs, Entity Framework Core, SQL, AWS-hosted services, and production support, with measurable impact in performance, security, and delivery. Also uses AI coding agents and AI-assisted workflows to speed up debugging, refactoring, and documentation.

## EXPERIENCE

Xentra Infotech Solutions Inc. (Remote) | Backend Developer Dec 2023 - May 2026

- **98% API latency improvement** — Migrated database connectivity from MySql.Data to MySqlConnection in AWS-hosted payment services, cutting worst-case waits from ~60 seconds to under 1 second.
- **Backend API delivery** — Built and maintained ASP.NET Core Web APIs and microservices for fintech products across payments, cash management, and access control.
- **Security delivery** — Implemented JWT, OAuth 2.0, and OpenID Connect with RBAC/ABAC, and helped keep production-bound services free of high/critical Snyk findings.
- **Data modeling and persistence** — Designed relational data models and implemented Entity Framework Core and SQL data access for production workloads.
- **Support and workflow leverage** — Documented APIs with Swagger/OpenAPI and Postman, collaborated with QA and frontend teams on live issue diagnosis, and used AI-assisted workflows for debugging, refactoring, and documentation.
- **Delivery cadence** — Contributed across 17 production repositories with 1,100+ tracked commits over 3 years.

Xentra Infotech Solutions Inc. (Remote) | Backend Developer Trainee / Intern Mar 2023 - Dec 2023

- Supported ASP.NET MVC and SQL backend work across modules, bug fixes, and feature delivery.
- Diagnosed application issues, assisted with query tuning, and helped optimize backend logic for stability and scalability.
- Built utility scripts, joined stand-ups and code reviews, and contributed to internal delivery workflows.
